

LOAD STOPPING TOOL

100% Brazilian

DESIGNED TO OPEN ENERGIZED SWITCHES - BRAZIL'S FIRST OF A KIND!
HOMOLOGATED BY THE MAIN BRAZILIAN ELECTRICAL UTILITIES

Portable Device for opening energized switches. Light-weight, practical and efficient in extinguishing the electrical arc when opening knife and fuse switches. Two models are available: (a) with manual operations marker; (b) with automatic counting device;

Voltage ratings: 24,5kV and 34,5kV;

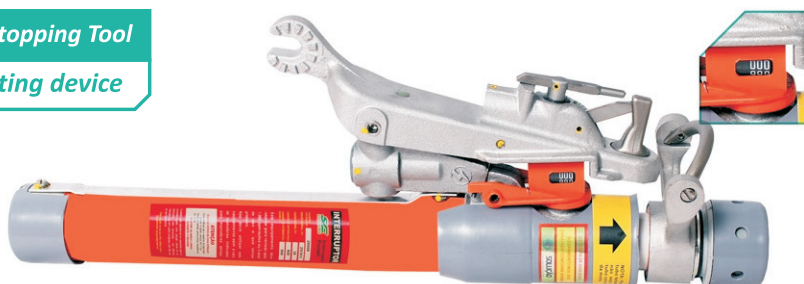

Current: 600 - 900A.

Provided with universal fitting for regular and telescopic hot stick operation, tested to IEC 60265 international standard.

Both models are supplied in our original high strength polymer case, for conditioning and transport purposes.

24,5 and 34,5kV Load Stopping Tool

With automatic counting device

24,5 and 34,5kV Load Stopping Tool

With manual operations marker
